**DEPARTMENT**: Computer Engineering

CLASS: TE 2020-21

TITLE/TOPIC: Workshop on "Python Programming".

DAY & DATE: 14th December 2020 to 18th December 2020

DURATION OF EVENT: 5 Days

STUDENT/ STAFF PRESENT: 60/5

CO-ORDINATOR: Asst. Prof. G.B. Yadav

DESCRIPTION:

Artificial Intelligence (AI), Machine Learning (ML) and Data Science (DS) are the pillars of the fourth industrial revolution. ML is an application of AI which allows computers to automatically learn from data without being explicitly programmed. Python has been designed with the provision for creating Machine Learning algorithms. Python is preferred as the best and robust platform for Machine Learning systems. Python also has numerous libraries for machine learning, data manipulation and analysis as well as a very active development community that continuously updates and creates new packages. It has been adopted by a wide variety of industries and applications including Data Science, Machine Learning, Data Analytics, Predictive Analytics, Business Intelligence and Web Analytics. This workshop aims to explore Python Programming right from installation, fundamentals to Machine Learning algorithms.

The workshop covered the basic algorithm that helps us to build and apply prediction functions with an emphasis on practical applications.

The outcomes of this workshop are:

- Understand the components of a Machine Learning algorithm.
- Apply Machine Learning tools to build and evaluate predictors
- How Machine Learning uses computer algorithms to search for patterns in data
- How to uncover hidden themes in large collections of documents using topic modeling
- How to prepare data, deal with missing data and create custom data analysis solutions for different industries
- Basic and frequently used algorithmic techniques including sorting, searching, greedy algorithms and dynamic programming

Familiarity with Python installation, syntax and design. At the end of this workshop, Mr. Chaitanya Patil demonstrates the designing of small running projects. He conducted a quiz as whole workshop content and will gave certificate after the evaluation the quiz & performance of students.

15. **Description (program conduction details) / speaker topic explanation:**

Mechanical Department of Rajgad Dnyanpeeth's Shri Chhatrapati College of Engineering Dhangwadi, Pune in association with CADD Centre, Pune has conducted one week FDP & SDP on **"Applications of CAD Software's in Industries"** from 10/02/2021 to 13/02/2021 for faculties and students of Mechanical Engineering to give information about **different CAD and CAE software's used in the industry.**

The mechanical design engineers have to learn different software's, because not every company uses same software for CAD and CAE.

Like if someone works for Godrej, they used to have AutoCAD and SOLIDWORKS for designing purposes, now all they use is CREO PTC.

SHRI CHHATRAPATI SHIVAJIRAJE COLLEGE OF ENGINEERING

Gat No. 237, Pune Bangalore Highway, Dhangawadi, Tal – Bhor, Dist- Pune (MH)

There are many software's that can be helpful to find jobs for mechanical design engineers. So the information about those software's is given in this FDP & SDP.

- AutoCAD - this is a basic and must learn software, AutoCAD draughtsman jobs are plenty in market.

- SOLIDWORKS - The best 3D modeling software, very useful and dynamic. Jobs opportunities are very high.

- CATIA - Most complex software, useful where there needs to be precise surface finishing such as in aerospace engineering or creating aerodynamic / aerofoil structures

- SOLID EDGE - Used in Medium scale industries, bio medical tools manufacturing, Lifts manufacturing industries. This software is a product of Seimens and works very efficiently.

- Inventor / Fusion 360 - These software's are generally used at institutional level. The inventor Professors are paid high salary at institutes. The Fusion 360 helps you learn CAD, CAM and CAE at one place.

- Seimens NX - Formerly known as NXCAD or UGNX, Great product of Seimens used at medium scale or small scale industries.

- CREO - Highly Agile, assembly properties and Analysis is very advance. This is all in one package for modeling. CREO is difficult to learn but once you learn it; you will find ease in learning other software's. Very high in demand nowadays.

- ANSYS - The various modules that ANSYS covers are,

  ANSYS Mechanical: Whatever be the structural problem at hand, be it linear, non linear or dynamic ANSYS provides the FEA package to do so.

  ANSYS Fluent, CFD, CFX: For all computational fluid mechanics problems, ANSYS provides this virtual environment to do so.

Also the SDP and FDP guided the participants about the Internship. So that the training institute or company will teach them all the basics for Designing and Detailing. In this way they can work independently when it comes at Industrial Job.
