**REPORT OF WORKSHOP ON NEW TECHNOLOGY IN COMPUTER
ENGINEERING**

TOPIC: "WORKSHOP ON NEW TECHNOLOGY IN COMPUTER ENGINEERING"

DAY/ DATE: 22nd to 28th of Feb 2023, Wednesday to Monday

DURATION OF EVENT: 11:00 am to 4:00 pm.

OBJECTIVE

1. Provide student a conceptual overview of New Technology in Computer Engineering.
2. Understand and use essential technique of New Technology in Computer Engineering.

SUMMARY

The Workshop has started with Mr. B. M. Borhade briefing the students about "New Technology in Computer Engineering" and then provided the students with some free sources and sites from which they can get more information about the topic and probably can make something good out of it. Prof B. D. Thorat (Head of Department) welcome the Guest Mr. B. M. Borhade.

The Workshop covered the basic techniques that help students to build and apply prediction function with an emphasis on practical applications.

The course outcome of the Workshop:

1. Familiarize the functional/operational aspects of New Technology in Computer Engineering.
2. Understand emerging concepts of New Technology in Computer Engineering.

The session commenced with a brief introduction to **New Technology in Computer Engineering**, as science and technology have become essential aspects of our lives. Technology was a luxury at a point in time, but now it has become a necessity. It is impossible to survive without electricity, television, music systems, mobile phones, internet connections, etc. We start and end our day with technology. So it is indeed difficult to imagine our life without technology, but it should be used with caution. If we become too dependent on technology, it will end up being harmful to us and

our health. Overuse of technology can also become self-destructive, so it is important everyone uses technology only when necessary.

Then Mr. B. M. Borhade explained the importance of new technology. Advanced technology has increased productivity across all fields of work. Technology is our new present and future, and it has made life easier and more convenient for us. Humans have become more reliant on science and technology as a result of technological advancements. Every human activity has now been replaced by one created by machines. We rely on technology for every aspect of our lives, and it has become an inseparable element of our lives. The use of contemporary technology has made the entire civilization reliant on it. Without technology, life and business would grind to a halt.

**REPORT OF A TRAINING PROGRAM ON
"CNC PROGRAMMING AND OPERATION"**

In Association with

MITCON and ACG Cares Foundation

DEPARTMENT: Mechanical Engineering

NAME OF GUEST/EXPERT: **Mr. Pramod Ganpat Patole**
CNC Operations & Programming, TOT

TITLE OF SESSION: "CNC Programming and Operation"

DAY & DATE: Tuesday, 17th January 2023 to Friday, 31st March 2023

STUDENTS & FACULTY PRESENT: 35

CORDINATOR: Prof. M. B. Bankar

DISCRPTION:

Department of Mechanical Engineering, Rajgad Dnyanpeeth's Shri Chhatrapati Shivajiraje College of Engineering organized a 90 hours program on "**CNC Programming and Operation**" held from 17th January 2023 to 31st March 2023. The resource persons were Mr. Pramod Ganpat Patole, CNC Operations & Programming, TOT from MITCON. The program started with the Welcome address by Prof. S. K. Pawar, Head Department of Mechanical Engineering in which the guests were introduced. Now in a day's use of CNC Machine in all industries is increase day by day so this program introduces the concepts and capabilities of computer numerical control machine tools. With completion of this program students are able to operate CNC machine as well as able to program any industrial component.

After Completion of this introductory session start with all terminology related CNC machine is explained to students so they will understand all the parameters of CNC part programming easily. The CNC part programming is based on coding so all coding system explain by resource person to student and so that they can understand brief of programming.
