As a part of academic curriculum, we visited the above site. We observed & studied the following things.

Content of studies:

A truss is essentially a triangulated system of straight interconnected structural elements. The most common use of trusses is in buildings, where support to roofs, the floors and internal loading such as services and suspended ceilings, are readily provided. The main reasons for using trusses are: Long span, Lightweight,Reduced deflection (compared to plain members) Opportunity to support considerable loads. Trusses are used in a broad range of buildings, mainly where there is a requirement for very long spans, such as in airport terminals, aircraft hangers, sports stadia roofs, auditoriums and other leisure buildings. Trusses are also used to carry heavy loads and are sometimes used as transfer structures. single storey industrial buildings, where trusses are widely used to serve two main functions: 1)To carry the roof load 2)To provide horizontal stability.

Types of Trusses are Pratt Truss, Howe Truss, Flink Truss, Warren Truss, North light Truss

PREAMBLE

Collaborative efforts in engineering education have become the key to success. The TEQIP project encourages institutions to establish MoUs with neighboring institutions and Industries on viable collaborative / consultancy project with specific time-frames and well-defined outputs. The collaboration could be in the areas of joint projects of students and faculty, joint publications, joint sponsored projects from funding agencies, joint faculty and staff development programmes, joint consultancy projects with a sound revenue sharing model *etc*. The institutions are required to establish collaboration through MoUs. The two institutions signing this MoU have agreed to work on the philosophy mentioned in this preamble.

1/3

2. PURPOSE

The aim of this MoU is primarily to establish a written document under which both the institute (SCSCOE) & institute (KARMYOGIENGG) may enter into a written agreement to perform collaborative programmes in the areas of mutual interest.

3. AREA OF COLLABORATION

Areas in which SCSCOE and KARMYOGIENGG may collaborate are as follows:

- I. Start Collaborative Research Programme of mutual interests.
- II. Developing Centre of Excellence.
- III. Faculty exchange program (Expert Lectures, STTPs, Workshops etc.) between SCSCOE and KARMYOGIENGG.
- IV. Provide training on latest technology available in the institution.

Any other activity not covered by this MoU shall be decided on a case to case basis by the two institutions – SCSCOE and KARMYOGIENGG.

4. AGREEMENT OF COLLABORATIVE PROGRAMMES

Each such collaboration undertaken by the institutes shall describe in details the following:

- The nature, scope and the time of collaborative schedule.
- Any other provision as deemed to be necessary and agreed by both.

To prepare and finalize a concrete action plan and schedule for collaboration on priority areas as agreed upon by both.

5. NODAL AUTHORITY

The Nodal Officer from KARMYOGIENGG shall be the Principal, KARMYOGIENGG, Pandharpur or his nominee and the Nodal Officer from SCSCOE shall be the Principal, SCSCOE, Pune or his nominee for all decision making and concurrence.

6. IMPLEMENTATION AND ACTION PLAN

KARMYOGIENGG and SCSCOE Mumbai shall endeavor to finalize the details of implementation and action plan of collaborative efforts to execute the parts of this MoU from the academic year 2016-26.

This MoU shall be effective from the date of signing the same and shall remain in effect for the subsequent four years and may be renewed or discontinued thereafter by mutual consent.

The two institutions hereto have executed this agreement on the date and the year first herein above written.

- 8. Number of Participants: 31
- 9. Objectives:
 - To know the new trends in structural engineering
 - To know the career ideas related with structural engineering
 - To learn various software's for design of RCC and Steel Structures

10. Description :

Structural engineering is a dynamic field that constantly evolves to meet the demands of modern society. This seminar report explores the recent trends in structural engineering, highlighting innovations and advancements that have shaped the industry. The report covers various aspects, including materials, design methods, sustainability, and technology integration.

1. Advanced Materials: High-Performance Concrete (HPC) Recent developments in concrete technology have led to the production of high-performance concrete, which exhibits enhanced durability, strength, and workability.

2. Innovative Design Methods: Parametric Design Structural engineers are increasingly utilizing parametric design tools to optimize structures based on various parameters. This approach allows for the exploration of numerous design possibilities and the generation of efficient and cost-effective solutions.

Gat No. 237, Pune Bangalore Highway, Dhangawadi, Tal - Bhor, Dist- Pune (MH)

3. Sustainability in Structural Engineering: Green Building Materials: The emphasis on sustainability has led to the incorporation of eco-friendly materials, such as recycled steel and bamboo, in structural projects. These materials not only reduce environmental impact but also contribute to the overall efficiency of structures.

4. Technological Integration: Building Information Modeling (BIM): BIM has revolutionized the way structural engineers collaborate and communicate.

Session with intoduction 12. Conclusion:

PPT Presentation

The field of structural engineering is undergoing a transformative phase driven by technological advancements, sustainability goals, and a focus on resilience. The integration of advanced materials, innovative design methods, sustainable practices, and cutting-edge technologies is shaping the future of structural engineering. As the industry continues to evolve, staying informed about these recent trends is essential for professionals and researchers in the field.

STAAD PRO SOFTWARE TRAINING PROGRAM REPORT

DEPARTMENT Civil

CLASS: BE students

NAME OF RESOURSE PERSON : Mr. Prajwal Gaikwad (ME Civil)

FROM: VA- Computer Institute Bhor Pune.

TITLE/TOPIC: Add on Course on "STAAD Pro Software Training Program"

DAY & DATE: 04/03/2023 to 26/03/2023 DURATION OF SESSION: 30 hrs

ATTENDIES: 10

CO-ORDINATOR: Prof. S. P. Salunkhe, Prof. S. S. Jadhav

<u>OBJECTIVE</u>: The objective of the Course is to create awareness among participants along with hands-on experience regarding concepts of STAAD Pro, and its applications.

DESCRIPTION: Department of Civil Engineering organized online Bridge Course on "STAAD Pro Software Training Program" on 04/03/2023 to 26 /03/2023 for BE Civil students to give information about STAAD Pro. This STAAD Pro training is created It is a software used in construction. It analyses and assesses seismic performance and checks the load-bearing capacity of building structures. Using this software, you can view and manipulate the analytical model with great accuracy. Plans and elevation views are auto-generated at every grid line. STAAD Pro software is used for the analysis of concrete shear walls and concrete moment frames. It is highly acclaimed for static and dynamic analysis of multi-storey frame and shear wall buildings.

The input, output and numerical solution techniques of STAAD Pro are particularly designed to take an upper hand of the unique physical and numerical characteristics associated with building type structures. As a result, this analysis and design tool accelerates data preparation, output interpretation, and overall execution.

REPORT OF GUEST LECTURE ON NATURAL LANGUAGE PROCESSING

TOPIC: "GUEST LECTURE ON NATURAL LANGUAGE PROCESSING"

DAY/ DATE: 27th of March 2023, Monday

DURATION OF EVENT: 11:00 am to 1:00 pm.

OBJECTIVE

- 1. Provide student a conceptual overview of Natural Language Processing.
- 2. Understand and use essential technique of Natural Language Processing.

SUMMARY

The guest lecture has started with Mr. Chandrakant D. Kokane briefing the students about **Natural Language Processing** and then provided the students with some free sources and sites from which they can get more information about the topic and probably can make something good out of it. Prof B. D. Thorat (Head of Department) welcome the Guest Mr. Chandrakant D. Kokane.

The guest lecture covered the basic techniques that help students to build and apply prediction function with an emphasis on practical applications.

The course outcome of the guest lecture:

- 1. Familiarize the functional/operational aspects of Natural Language Processing.
- 2 Understand emerging concepts of Natural Language Processing.

The session commenced with a brief introduction to Natural Language Processing (NLP), the study of computing systems that can process, understand, or communicate in human language. Mr. Chandrakant D. Kokane explained fundamental approaches, largely machine learning and deep learning used across the field of NLP. He also spoke about a comprehensive set of NLP tasks, both historical as well as contemporary. He elaborated on the various techniques used in NLP - like Bayes nets, conditional random fields, structured max-margin, tree-structured models, recurrent and convolutional neural networks and attention mechanisms. He further touched upon the various problems, ranging from syntax (parts-of-speech tagging, parsing) to semantics (lexical semantics, question answering, grounding). He explained the various applications such as summarization,

machine translation, information extraction and dialogue systems. The Speaker then spoke about Chat Bot software. He explained how students can create their own Chat Bot application, and the situations where we use this application in real life. He informed the students about the career opportunities in NLP. He stressed on the importance of NLP, especially in India. Mr. Chandrakant D. Kokane spoke about the sentimental analysis in social media content and gave ideas for further research and development in this area. He motivated students to explore jobs with NLP. The session culminated with a Q/A session, where the students cleared their doubts related to Natural Language Processing and Speech Recognition.

Subject: Permission letter for industrial visit.

Respected Sir/Madam,

On behalf of Shri Chhatrapati Shivajiraje college of Engineering, Bhor, Pune, I want to arrange an industrial visit in your industry; I am writing this letter to you for getting permission for the same.

Objectives of industrial visit are to provide students an insight regarding internal working of companies. We know, theoretical knowledge is not enough for making a good professional career. With an aim to go beyond academics, industrial visits provide students a practical perspective on the world of work.

We decide to give some practical education to the students about the industrial procedures and its facilities. For that your firm is the best option a carry on such projects. In that case we need your support. The 60 students of TE Comp will be the part of trip accompanied by 4 teachers. The date of visit is 24/08/2022.

Hope you understand the need of trip for education purpose. So kindly grant us the permission for the same.

Thanking you,

Yours' Faithfully

AUTO CAD SOFTWARE TRAINING PROGRAM REPORT

DEPARTMENT Civil

CLASS: SE & TE students

NAME OF RESOURSE PERSON: Mr. Abhijeet Gaikwad (BE Civil)

FROM: ECADD Institute Bhor.

TITLE/TOPIC: Add on Course on "Auto Cad Software Training Program"

DAY & DATE: 03/10/2022 to 07/10/2022 DURATION OF SESSION: 30hrs

ATTENDIES: 20

ì

CO-ORDINATOR: Prof. S. P. Salunkhe, Prof. S. S. Jadhav

<u>OBJECTIVE</u>: The objective of the Course is to create awareness among participants along with hands-on experience regarding concepts of Auto Cad functions, and its applications.

DESCRIPTION: Department of Civil Engineering organized online Add on Course on "Auto Cad Software Training Program" on 03/10/2022 to 07/10/2022 for SE, and TE Civil students to give information about Auto Cad. This Auto CAD training is created and designed in such a way that helps the learners to gain immense knowledge and understanding about the applications and purpose of the software. With this training the students will get a brief knowledge about the most commonly used tools and functions to create simple and basic projects with AutoCAD. The core objective of this training is to provide students a platform where they can explore and take the right career opportunities by mastering this program.

A student who has studied this course can take up several career options such as AutoCAD operator, AutoCAD chargensman, AutoCAD engineer and many more nature paths can be explored by learning the right skill and technique of the program.

SHRI CHHATRAPATI SHIVAJIRAJE COLLEGE OF ENGINEERING Gai, No. 237, Pune Banglore Highway, Dhangawadi, Tal: Bhor, Disi: Pune

CONCLUSION. In conclusion, Auto Cad as an architectural planning tool. It enables architects to design, plan, execute and analyze the strength of a building at the design stage level. Auto('A1) as an engineering drafting tool: It helps engineers to design, analyze and solve design issues resulting in accurate designs.

"Vastushastra"

(3rd & 4th March 2023)

Organized By

Department of Civil Engineering

Savitribai Phule Pune **University Pune, India**

ABOUT THE COLLEGE

Rajgad Dnyanpeeth Technical Campus is established in 2009 with the objective of creating state of the art learning facilities in selected fields of engineering & technology. The Institute has lavish green historical location surrounded by prime industries of Maharashtra. The Institute caters to four disciplines at UG and Diploma viz. Civil, Computer, E&TC and Mechanical Engineering approved by AICTE, New Delhi, recognized by Maharashtra Government and is affiliated to Savitribai Phule Pune University, Pune.

The aim of the institute is providing an enjoyable learning experience to the students throughout their entire tenure in the college. In addition to their academics, students can participate in wide variety of extracurricular activities in the field of arts, sports, & will receive institutional support to excel in those, at both learning as well as competitive levels.

WORKSHOP OUTLINE

- Overview of the history of Vastushastra its origin to present with reference to Vedic Vastushastra
- Principle of Vastushastra.
- Development of Vastu from mythological age to modern age.

- 14. Outcomes: Practical house planning in accordance with Vastu Shastra principles
- 15. Description (program conduction details) / speaker topic explanation:

Rajgad Dnyanpeeth's Shri Chhatrapati College of Engineering Civil Department Dhangwadi, Pune has conducted a Workshop on "Vastushastra" on 3rd March to 4th March 2023 for SE and TE students of Civil Engineering to give information about "Vastushastra" The ultimate objective of the study is to analyse the behaviour of traditional beliefs in house construction with the aid of modern engineering technology and to discuss how meaningful beliefs can be used in modern construction fruitfully Although modern society is at the apex of science and technology, the shadows of traditional customs and beliefs in various fields can be seen. When the field of house construction is considered, traditional beliefs had been playing a

considerable role which can be seen in Asian countries rather than European countries. Since hardly any engineering-based studies have been done to explore the signifcance of traditional beliefs in house construction.

16. Conclusion: The Workshop on "Vastushastra" explained Traditional beliefs in house construction are one of the main knowledge heritages mainly nourished with Vastu Shastra, considerations and faiths which have been transferred from generation to generation. The aim of the study was not to discriminate such beliefs or label them as superstitions Instead, the study tried to provide rational engineering explanations to selected traditional beliefs which can be studied with the aid of engineering technology.

Go-Green Technologies Pvt. Ltd. background and credentials:

Historically India was known for its self-reliance and world-class education system. Our share in the world GDP used to be as much as 25 percent. Due to several reasons, we have lost our past glory. Though we are celebrating 75 years of independence, we are struggling to establish our own identity in the global market. We have shown our capability to the world by boosting the nation's literacy in a short period through mass education. However, there is quality education, employability and creativity are a few of the many things in which we are lagging. Though the Government of India is reforming the current education system by announcing the new education policy NEP-2020, the outcomes are doubtful.

In this era of Industry-4.0, the expectation from every product that is being launched is to be smarter than the earlier one. Unfortunately, our education system is neglecting the hardware sector which is essential for any product that is launched. Most universities are offering courses related to Computer science, Data Science, and AI/ML. However, they fail to realize that this bubble will blow off in a few years. Because if we go ahead without understanding where the data is coming from and the hardware architecture, we will once age to the bus of global competitiveness and manufacturing.

With a good amount of academic, and industrial experience we are developing the technologies that will bridge the gap between a. Industry and Institute, b. Software and Hardware, c. Real-Time Systems, and Computer Systems. We strongly believe that 'activity-based learning' i.e. Doing it yourself is the only 'Mantra' to make our country competitive and self-reliant. We need to create an environment where a creative mindset, selfcontribution, and learning beyond the syllabus happening.

With our vast experience we have developed an Integrated Development Environment (IDE) i.e., 'IoT based Mobile Lab' where the learner can implement a hardware and software design anytime, anywhere. It doesn't require a conventional laboratory setup or equipment like Power supplies, Function generators, and a Digital Storage oscilloscope.

This will allow every individual student to become self-reliant and develop his/her personality. The direct benefits of this platform are employability, creativity, and entrepreneurship along with some indirect benefits like cost saving to laboratories of the institutions where each setup requires lakhs of the worth of equipment, which will reduce the import cost of lab equipment and also fees charged from the trainees can be reduced. In the long run, the benefits are self-sustainability and global manufacturing and mobility.

Since the main USP of our products is reducing the cost and providing a userfriendly environment, we developed a system in such a way that the common resources like Digital function generator, Digitization, Signal conditioning, I/O devices, and Communication are on the Baseboard. The subject/area-wise common resources shall be provided on the Piggyback boards.

By collaborating with various eminent faculty and institutes these features can be further customizable. It will provide a great opportunity to train the trainers, built local activity centers content development, and Registing

hardware skills development. Since Electrical Vehicles and Battery charging stations are going to be the next big thing, our country badly requires new infrastructure and manpower to handle digital power electronics.

The further score of work is the development of Piggyback boards for Linear Integrated Circuits, Electronic Devices, Basic Electronics & Networks, Digital Power Electronics, Signal conditioning, Embedded Systems, IoT, and Cyber-Physical Systems. At the advanced stage, these systems can be integrated into Mobile, Cloud, and LMS networking platforms.
