A lecture demonstration on snake safety was presented by Mr. Sabrej Khan. The four major poisonous snakes are the Indian king cobra, Russell's viper, the common krait and the saw-scaled viper. "The common krait does not leave any biting symptoms. The venom of the snake is meant not for biting the victims, but to inactivate their prey and digest. The venom of king cobra and Russell's viper affects the nervous system and causes neurosis" he added. The symptoms of disease are death of tissue, teeth markings. By keeping our environment clean and spraying Bellary onion extract, snakes can be avoided from entering.
