Visit Report

Class:-FE

Subject:- Basic Mechanical Engineering

Place of Visit: Pimpri Chinchwad Science Park, Near Auto Cluster, Chinchwad, Pune- 411019.

Visit Date: 07-04-2018 (Saturday), Time: 12.00pm to 03.00pm

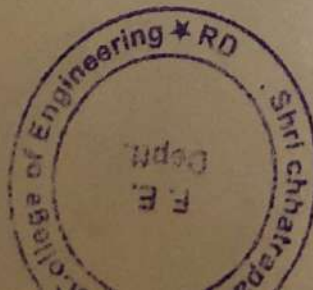

Present Students:50

Guide Name: Prof. Mane S. M. & Prof. L. P. Maskepatil

Pimpri Chinchwad Science Park is one of the latest tourist attraction and activity based Science Centre of Pune region. The Science Centre houses Galleries on different themes of Science & Technology, Activity area, Inflatable Taramandal and an Auditorium. It also has a open air Science Park spread over 3.5acres. Most of the exhibits in the science centre and science park are interactive in nature and visitors can explore science in an entertaining way.

The Centre also conducts many Science shows such as 3D Shows, Taramandal Shows and Live Demonstrations for visiting people and student groups. It also organises activity based programmes and workshops for students and teachers.

The Science Park is a non-formal educational institution to communicate developments in Science & Technology among the masses, and encourage creativity and spirit of enquiry among the students. Apart from providing effective environment for non-formal science education Pimpri Chinchwad Science Park is sure to enthuse and excite the people especially

students of the region creating awareness on important topical issues in science, technology and engineering.

The Science Centre has 4 Galleries on different subjects.

1. Automobiles

The 600 sq.m. gallery comprises of interesting exhibits in the form of interactive, kiosks, cut section models providing opportunities to peep into automobiles, 3D dioramas and exhibits explaining how automobile stuffs like spark plug, injector, silencers, wipers etc. work. Opportunity for virtual driving, testing your skills normally used in driving and activities on making of an automobile will certainly enthuse visitors.

2. Energy

In this exposition, spread over 400sq.m., various forms of energy, their production and practical applications, environmental issues, world energy reserves and future sources of energy are explained through various interactive exhibits, working models and multimedia presentation with added components in them.

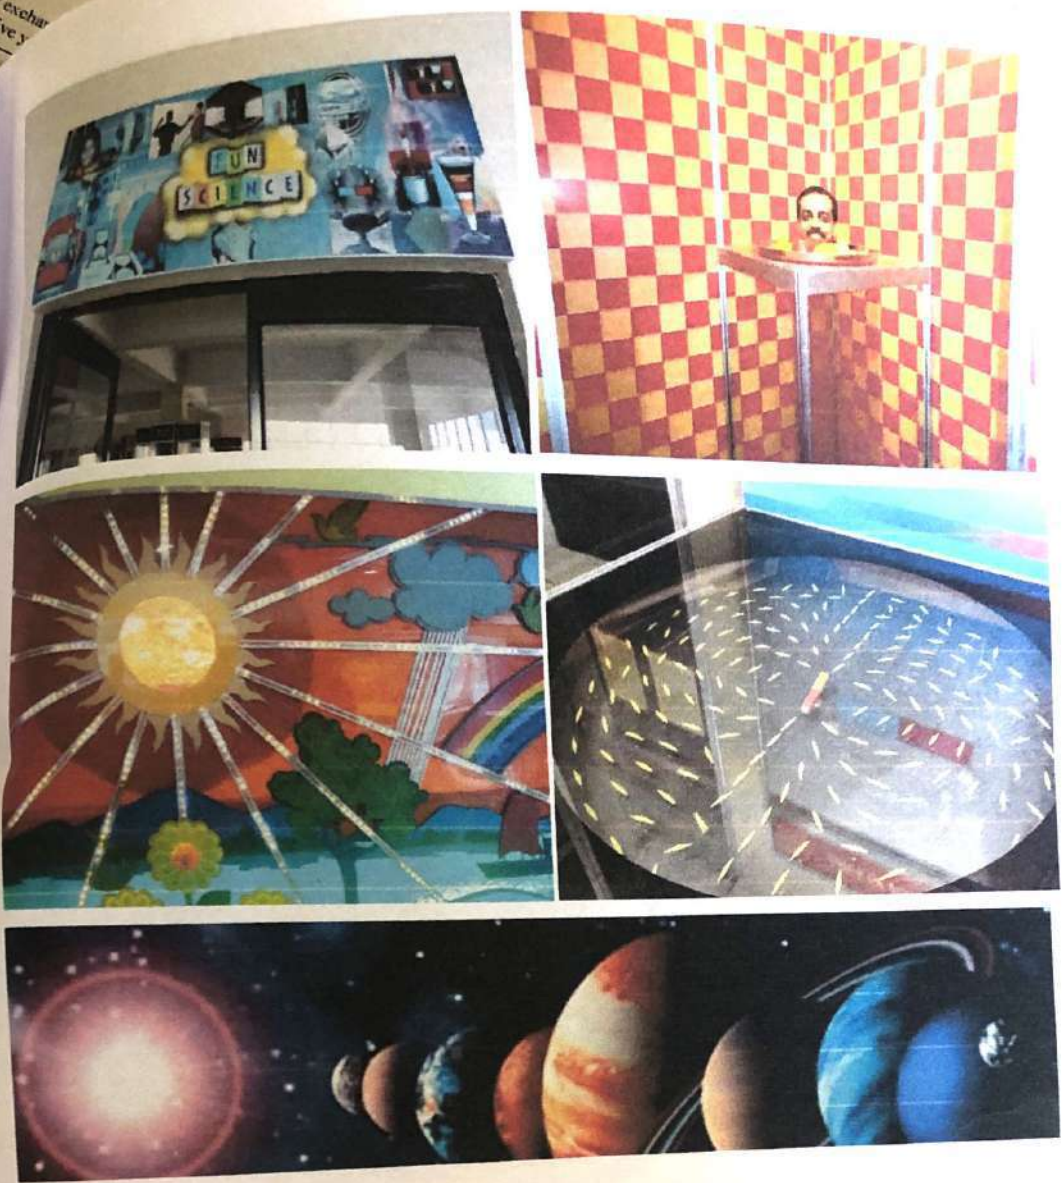

3. Fun science

The Fun Science Gallery, spread over an area of 600 sq m, is full of opportunities for visitors to interact, explore and experience various aspects of science in highly entertaining ambience. Most of the exhibit here are participatory which provide hands-on and minds-on experience to visitors and helps to clear basic concepts of Science.

As a part of Savitribai Phule Pune university academic curriculum it required to visit the Automobile service station so we had arranged a visit to PMT Workshop, Swargate.

Content of studies:

PMT Workshop, Swargate contain main nine departments like Engine section, Gear box section, Transmission Section, Electrical Section (Starter, Alternator, Pump and Battery), radiators, Brake Section, Tyre Section, Body section and Injector Section. We started visit from engine section in that they show all parts of engine (Cylinder, piston, valves, connecting rods, piston rings, cam shaft, and crankshaft) and its working. Also they show the parts of gear box, transmission system (propeller shaft, rear axle and differential) and how the maintenance is done. In injector section they show the types of injector, its parts and working of injector. They show all parts of mechanical brake drum system are used in bus which is operated with pneumatic system.

INDUSTRIAL VISIT-REPORT

Date:- 21/03/2018

- 1) **Class: B.E Mechanical.**
- 2) **Subject: Power Plant Engineering.**
- 3) **Name of Industry: Gas Turbine Power Station Uran, Maharashtra.**
- 4) **Date & Time: 20th March 2018 (10:30 am to 1:30 pm)**
- 5) **Present Students: 39**
- 6) **Contact Person with Designation & Phone No.: 1. Mr. Mithesh S Jha
(+91 9320271007) 2. Mr. Sulekar. (+91 9619046375)**
- 7) **Name of Faculty: 1. Prof. Gaikwad C.S
2. Prof. More D.A**

As a part of academic curriculum, we visited the above industry. We observed & studied the following things.

Content of studies:

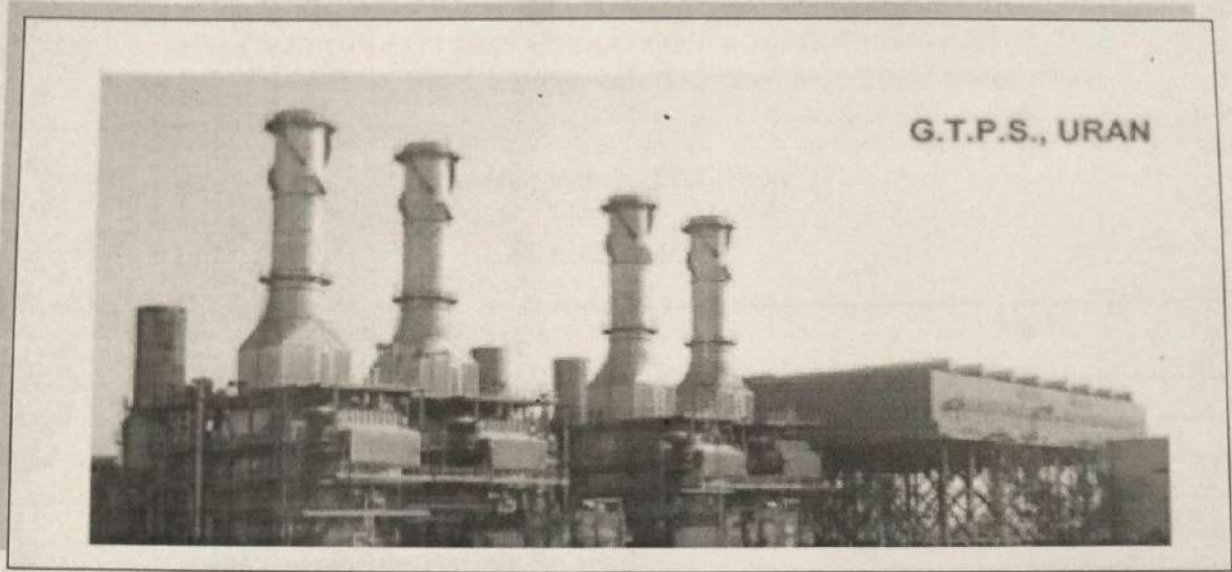

Uran Gas Turbine Power Station is a gas-based thermal power plant located at Uran in Raigad district, Maharashtra. The power plant is operated by the Maharashtra State Power Generation Company (Mahagenco) It has an installed capacity of **672 MW** (4x108 MW, 2x120 MW). The power plant were designed in such a way that it could be upgraded later on to an integrated gas and steam turbine plant for minimum load operation. Gas turbines usually operates on an open cycle. Air at ambient conditions is drawn into the compressor, where its temperature and pressure are raised. The high pressure air proceeds into the combustion chamber, where the fuel is burned at constant pressure. The high temperature gases then enter the turbine where they expand to atmospheric pressure while producing power output.

Additional remark:

From this visit, we got the information and practical knowledge about Power Generation through Gas Turbine and transmission and distribution of power. Student got the knowledge about filter house, compressor, combustor chamber, gas turbine and generator. They got the idea how electricity is generated through gas turbine.

- 7) **Name of Faculty:** Prof. S. M. Jadhav

As a part of academic curriculum, we visited the above site. We observed & studied the following things.

Content of studies:

The site engineer giving all the information about Ready mix concrete plant, storage of material required for RMC Plant, Capacity of RMC plant, testing of concrete, and also give information about how to use software of mix design. Ready mixed concrete which is mixed at central batching plant and transported at the site by suitable means like belt conveyor, transit mixer. Transit mixer is a truck mounted mixer having capacity of 4 to 7 meter cube. Also there is a proper arrangement for storing material like coarse aggregate, Fine aggregate (Natural and artificial) etc.

As a part of academic curriculum, we visited the above industry. We observed & studied the following things.

Content of studies: At the beginning, In charge of the khamkarwadi wind farm explained about the wind mill installation, their generation, transmission and distribution. The wind direction rotates the wind turbine to face into the wind. The energy in the wind (called kinetic energy) turns the turbine blades around the rotor (creating mechanical energy).

The rotor connects to the main shaft, which turns inside the generator housing. Here, a magnetic rotor spins inside loops of cooper wire. The electricity generated then travels down large cables from the nacelle, through the tower, and into an underground cable. At wind farms, cables from different turbines take the electricity generated to a substation. Here, a step-up transformer again increases the electrical output. A transmission line connects the electricity output at the substation to the electrical grid serving communities throughout the region

Additional remark: From this visit, we got the information and practical knowledge about Power Generation through wind mill and transmission and distribution of power. Student got the knowledge about wind mill, wind turbine, generator. They got the idea how electricity is generated through wind mill.

REPORT OF INDUSTRIAL VISIT/TOUR

DEPARTMENT: Mechanical Engg. CLASS: T. E.
NAME & PLACE OF ORGANIZATION VISITED: Hydro power station (Dhom)
DAY & DATE: 6/10/2017 Friday. DURATION OF VISIT: One day STUDENT/ STAFF PRESENT: Students - 59
COORDINATOR: Mr. Gaikwad C.S. staff - 02

OBJECTIVE:
To get a through idea about hydroelectric power, operation of generator.

DISCUSSION:

- 1) - With an aim to go beyond academics, Mechanical department of SSCOE had organized an Industrial visit to "Dhom Hydro power station", satara district, Wai. on 6th Oct 2017.
- 2) - DHOM 2x1 MW capacity Hydro power station. Kaplan turbine installed at basement electricity house which generate electricity of 4mw.
- 3) Installed capacity - 2mw., Height - 50m, Length 2,478m, Dam volume - 6.335km³

CONCLUSION:

We understand the function of each components in hydro power station, their importance, their arrangement and precautions that to be used for safety in the plant.

DHOM HYDRO POWER STATION

A. BRIEF HISTORY

DHOM 2 X 1 MW Capacity Hydro Power Station has been constructed at Vyahali colony dam near Wai in Satara District. This dam is across the river Krishna. This power station lies on the right bank of river in Satara District. Hydro power station is 68 Kms. from Pune. Two separate outlets, one for ID & other for Power have been embedded in the right bank of the dam. Dhom left bank canal bifurcates from right bank canal via aquaduct on downstream side. All the equipments under these specification shall be designed to withstand under earthquake forces of dynamic strength of 0.3 g in horizontal direction & 0.5 g in vertical direction, where g is gravitational action.
