ERP Report

The educational enterprise resource planning (ERP) software, iCloudEMS is a cloud-based automation college ERP system/software which manages the entire administration, campus operations, and academic management in an efficient way. It is targeting primarily the educational ERP markets in India.

This Device Used in this campus in Academic Year 2018-19. The objective of the ERP-Software is to promote Paperless Office & Protect the Environment Friendly Campus. ERP software will help RDTC Campus in many ways. The application will help to streamline all the processes including, administration, Student attendance, Courses, Assignments, Question Bank, Teaching Plans, inventory and facilities management, transport, generating reports like examination, mark sheets and it will also be very useful for managing the database of the students and coordinating with parents.

Advantages of ERP-Software:

1. Save paper & reduce teacher workload
2. Save money
3. Complete automation for smarter decisions
4. Improve student and parent engagement

Modules to be available in the ERP application:

1. Administration
2. Admission Process
3. Fees Collection
4. Attendance Student/ Staff
5. Student Details
6. Examination
7. Bulk SMS and email

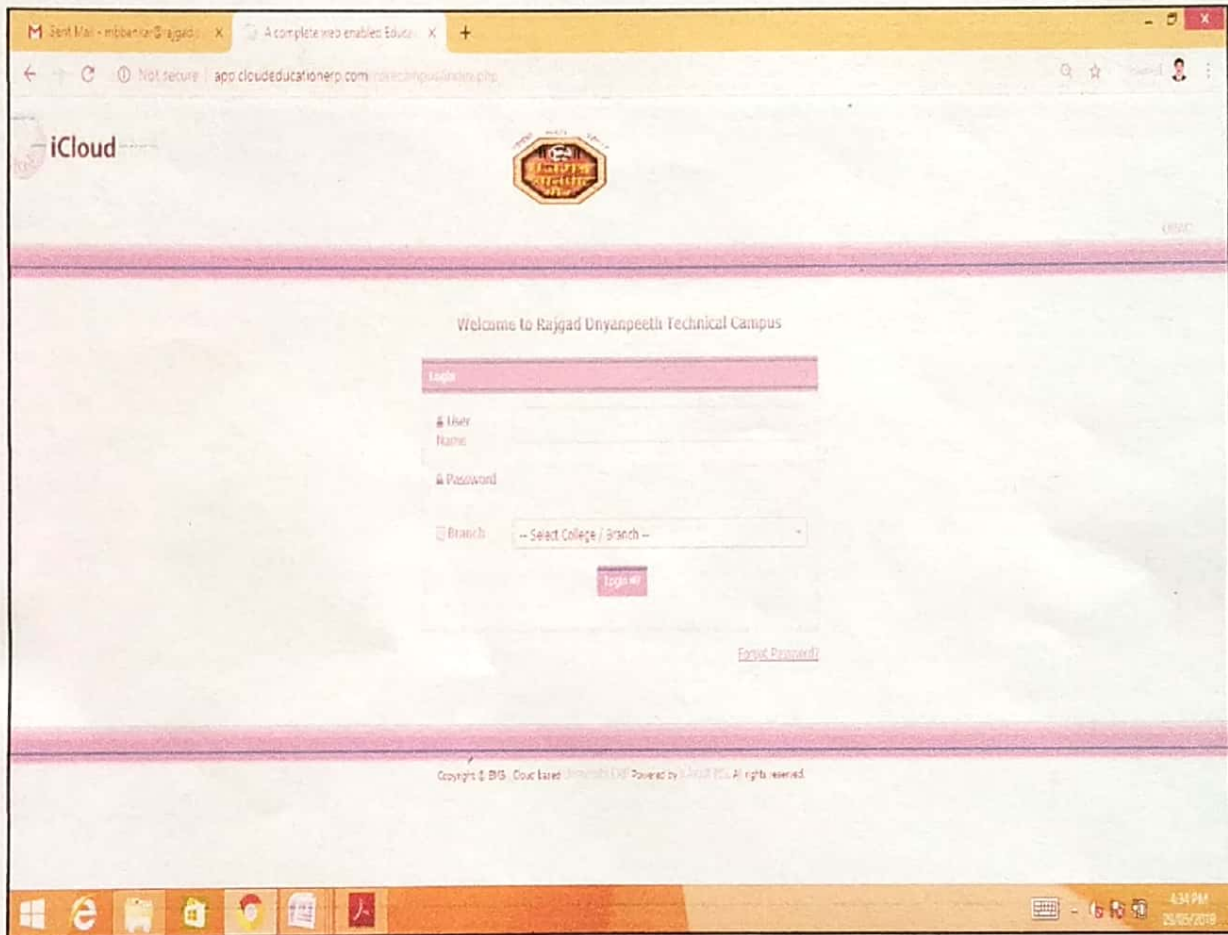

8. Report Generation

9. Manage Transportation

10 Parent coordination

13	1823013	PRAYAN DASHRATH PATIL	95.83	24	87.1	0	0	0	0	0	0	0	0	0	82.5

OUTCOME:

This system is very helpful in saving valuable time of Teaching & Non-Teaching Faculty, paper and generating report at required time. Also, it reduces most of the administrative jobs and minimizes human errors, avoids proxy attendance, and helps to update and maintain attendance records. The benefits and impacts provided by ERP systems need a rigorous evaluation. Most existing evaluation studies of ERPs focus on technical issues or implementation processes, these do not provide an explanation about ERPs effects, or if ERPs work well or poorly with a specific user in a particular setting.
